#### INFORMATION RELATIVE TO THE STREET PAVING

To the Public:—There have been several inquiries regarding the progress of the paving contemplated by the city, and an explanation of the procedure being followed by the council may be pertinent at this time for the information of interested owners. Under the law and the mandate of the people, it became incumbent upon the council to form a paving district. This was done some time ago and the limits described in the papers. In forming this district, the council found it possible and thought it fair to include all territory classed as business properties. It was also thought that by making the district as large as possible under the bond issue, that better figures could be obtained by reason of the large contract.

A majority of the property owners in this district may protest against the information within thirty days after first publication of the notice and nullify the formation. If the district is rejected in this manner another or other districts may be formed subject to like option of a majority of the owners. If this district should be ratified, by a failure of the majority of the owners to protest, then it is incumbent upon the council to pass an ordinance ordering the paving and within thirty days after the publication of such ordinance the owners may file with the council their written choice of materials to be used. The city engineer at this time is engaged in making a grade survey of the entire city and particularly of that part of the city where paving will probably be laid, with the object of getting proper drainage.

If the present district remains intact, we should be ready to proceed some time next spring.

Respectfully,  
E. H. EVANS, Mayor.
